

# Inspire 1 RAW Release Notes

## 2016.07.07

1. Firmware upgraded to v1.9.1.30
2. DJI GO iOS upgraded to v2.8.4
3. DJI GO Android upgraded to v2.8.2
4. DJI CineLight upgraded to v0.9.26
5. DJI Camera Exporter upgraded to v1.0

## Major Updates

1. Fixed issue of temporary Vision Positioning System sensor error on rare occasions for some aircrafts.

## Notes

- Aircraft version v01.09.01.30 and camera version v01.09.01.10 should be displayed in DJI GO. The version will only display correctly in DJI GO after connecting to the Internet when the upgrade is complete.
- The firmware can only be downgraded to v01.08.01.40 or later.

# Inspire 1 RAW Release Notes

## 2016.06.13

6. Firmware upgraded to v01.09.01.10
7. DJI GO iOS upgraded to v2.8.3
8. DJI GO Android upgraded to v2.8.1
9. DJI CineLight upgraded to v0.9.26
10. DJI Camera Exporter upgraded to v1.0

## Major Updates

1. Updated the Flight Restriction Zone database.
2. Improved the camera system stability.

## Notes

- Camera version v01.09.01.10 and aircraft version v01.09.01.10 should be displayed in DJI GO. The version will only display correctly in DJI GO after connecting to the Internet when the upgrade is complete.
- The firmware can only be downgraded to v01.08.01.40 or later.

# Inspire 1 RAW Release Notes

## 2016.04.27

1. Firmware upgraded to v01.08.01.40
2. DJI GO iOS upgraded to v2.8.0
3. DJI GO Android upgraded to v2.8.0
4. DJI CineLight upgraded to v0.9.17
5. DJI Camera Exporter upgraded to v1.0

## Major Updates

1. Current video resolution will be automatically saved to the camera when powered off normally.
2. Added FrameRate and Whitelevel information to the DNG sequence.
3. Fixed an exception that might occur when tapping the video button while the X5R SSD is initializing.

## Notes

- Be sure to upgrade your product as this firmware upgrade includes improved camera features.
- Camera version v01.08.01.40 and aircraft version v01.08.01.00 should be displayed in DJI GO. The version will only display correctly in DJI GO after connecting to the Internet when the upgrade is complete.

# Inspire 1 RAW Release Notes

## 2016.04.13

1. Firmware upgraded to v01.08.01.20
2. DJI GO iOS upgraded to v2.7.1
3. DJI GO Android upgraded to v2.7.2
4. DJI CineLight upgraded to v0.9.9
5. DJI Camera Exporter upgraded to v1.0

## Major Updates

1. Fixed the issue of batteries over-discharging when stored for extended periods of time (over 90 days).

## Notes

- Battery firmware is included in this firmware update. Update all Intelligent Flight Batteries by using this firmware.
- Camera version v01.08.00.90 and aircraft version v01.08.01.00 should be displayed in DJI GO. The version will only display correctly in DJI GO after connecting to the Internet when upgrade is complete.

# Inspire 1 RAW Release Notes

## 2016.04.07

1. Firmware upgraded to v01.08.00.90
2. DJI GO Android upgraded to v2.7.2
3. DJI CineLight upgraded to v0.9.9
4. DJI Camera Exporter upgraded to v1.0

## Major Updates

1. Improved encryption to enhance security during transmission. Both the aircraft and the remote controller must be upgraded or else they will not link.
2. Improved stability for camera.
3. Optimized gimbal parameters.

## Notes

- **Be sure to upgrade the aircraft before upgrading the remote controller, otherwise the aircraft may not be able to exit Transport mode properly.**
- Camera version v01.08.00.90 and aircraft version v01.08.00.90 should be displayed in DJI GO. The version will only display correctly in DJI GO after connecting to the Internet when upgrade is complete.

# Inspire 1 RAW Release Notes

**2016.03.24**
